  - Context API
  - Responsive web design
  - Cross Border Compatibility
  - Server-Side Rendering (SSR)
  - Static Site Generation (SSG)
  - Incremental Static Regeneration (ISR)
- ➤ **Back-End Technologies**
  - Node.js
  - Express.js
- ➤ **Database**
  - MongoDB
- ➤ **API Integration**
  - RESTful APIs
- ➤ **Version Control & Collaboration**
  - Git & GitHub
- ➤ **Performance Optimization**
  - Lazy Loading
  - Image Optimization
  - Debugging
- ➤ **Build Tools & Bundlers**
  - Babel
  - NPM / Yarn / Vite
- ➤ **Web Performance & SEO**
  - Google Lighthouse
  - Core Web Vitals
- ➤ **Other Relevant Skills**
  - Session Storage
  - Cookies
  - Local Storage
  - Data Structures & Algorithms(DSA)

ANSHU YADAV

Software Developer

Portfolio

Motivated Frontend Developer with 2+ years of experience in building scalable web applications. Proficient in React.js, Next.js, JavaScript, redux and Context API .

WORK EXPERIENCE

SHOBHIT MEDIWORLD LLP   *07/2024 - Present*

Designation: Front end Developer at Shobhit Infotech Part of Shobhit Mediworld .

Responsibilities:

- Built secure and efficient session-based storage to manage API tokens and user data, protecting 1000+ user records and optimizing personalized data access by 25%.
- Designed responsive, accessible UIs for 5+ user roles and integrated **Google Location API** for real-time address autocomplete, reducing input time by 40% and enhancing engagement by 30%.
- Developed interactive dashboards and data visualizations in a **SaaS**(Software as a Service) platform, improving representation and decision-making for 1000+ active users.
- Implemented dual-theme support using React **Context API**, enhancing user satisfaction by 10% with smooth **light/dark** mode transitions.

SAS ONE Pvt Ltd   *01/2023 – 06/2024*

Designation: Software Developer

As a Software developer I worked on Education Times and Times Ascent , also work on the Admin Panel of both Website.

Responsibilities:

- Integrated **5+** third-party and RESTful APIs, and collaborated with backend teams to optimize API performance, ensuring seamless frontend-backend communication and enhancing overall site functionality.
- Implemented secure authentication and authorization using **NextAuth**, managing access for over 100,000+ users across multiple web applications.
- Engineered high-performance, mobile-friendly web stories using **AMP Pages**, leading to a 30% boost in mobile traffic and a 60% improvement in site speed (75+ mobile, 95+ desktop scores).
- Translated 20+ UI/UX mockups into **responsive**, user-centric web pages in collaboration with designers, increasing user satisfaction by 20%.
- Developed and deployed a custom **CMS**(Content Management System) for Education Times and Times Ascent, streamlining content operations and reducing update time by 30%.

EDUCATION

- **Bachelor of Engineering in ECE, Technocrats Institute of Technology (2015-2019)**
